Selective Bibliography 345

“A truly monumental work as well as a masterful work by the West’s most incisive scholar of Marxism. . . . It will stand for a long time as the essential work on the subject.” —Zbigniew Brzezinski

One of the great historical works of the twentieth century, Leszek Kołakowski’s *Main Currents of Marxism*, now finally combined into one volume, describes the development of Marx’s philosophy and the contributions of his followers. It is a prophetic work of intellectual transcendence, essential to an understanding of modern political history.

“Very rarely can one identify a deep, reflective thinker who has had such a wide range of inquiry and demonstrable importance to major political events in his own time.”

—James H. Billington, Librarian of Congress

“Perhaps [Kołakowski] is properly thought of as the last illustrious citizen of the Twentieth-Century Republic of Letters. . . . It is quite impossible to convey in a short review the astonishing range of Kołakowski’s history of Marxist doctrine. It will surely not be superseded.”

—Tony Judt, *New York Review of Books*

“Philosopher, historian, theologian, political scientist and literary critic . . . there can be few more eminent figures in the world of ideas.”

—*The Times* (London)

“Remarkable for almost more reasons than one could list. . . .

One thing that cannot be over-emphasized is the sheer usefulness of the book. . . .

A distinctive and engrossing piece of work.”

—Alan Ryan, *Times Educational Supplement* (London)

LESZEK KOŁAKOWSKI, born in 1927 in Poland, was a professor of philosophy at the University of Warsaw until his departure. For many years he was a senior research fellow at Oxford University, and has taught at Yale, Chicago, and Berkeley. He has received numerous honors, including the Jefferson Prize, the Erasmus Prize, the 2007 Jerusalem Prize, and, in 2003, the first John W. Kluge Prize from the Library of Congress.
